Braylon Williams's Room & A/V Set Up

The following is a list of room and A/V preferences. Please know these are flexible if there are extenuating circumstances.

Staging: Braylon will use his laptop from the stage, so podium or table is needed. He will provide his own remote.

Lighting: Unless it presents an issue, Braylon prefers that the house lights are up enough to see the audience, normally up to 50%.

Microphones: Braylon's first preferred choice of microphones is a wireless lavalier microphone. His second choice is a wireless headset microphone, and his third choice is a wireless handheld microphone.

Screen & Computer Projection System: Braylon will use his own laptop, a MacBook Pro. An LCD/LED projector system compatible with a Mac computer is required. Preferred aspect ratio is 16:9. Braylon travels with the Apple adaptors needed and a wireless HDMI transmitter and receiver.

Media/PowerPoint/Materials: Braylon uses "Canva" and "Microsoft PowerPoint" to create his media presentation and often works on it up until the last minute so he can incorporate specific audience issues and current events.

Recording: Audio or video recording of Braylon's live programs is permitted if recorded by the event host/organizer. Any recording related to media interviews or promotional purposes must be approved in advance. Please advise your audience members that filming is not permitted.
